1. Purpose
2. Objectives
3. Stakeholder Identification
4. Stakeholder Analysis
5. Stakeholder Expectations
6. Stakeholder Influence Summary
7. Communication Considerations
8. Stakeholder Risks
9. Conclusion

## **1. Purpose:**

The purpose of this Stakeholder Analysis document is to identify all individuals and groups who are involved in or affected by the Student Performance Analytics & Decision Support System project. The document evaluates each stakeholder's role, level of interest, influence, expectations, and potential concerns to ensure effective stakeholder engagement throughout the project life-cycle.

Conducting stakeholder analysis enables the project team to gather accurate business requirements, manage stakeholder expectations, reduce project risks, and improve communication between business and technical teams.

## **2. Objectives:**

The objectives of this stakeholder analysis are to:

- Identify all project stakeholders.
- Understand stakeholder roles and responsibilities.
- Assess each stakeholder's level of influence and interest.
- Identify stakeholder expectations from the proposed solution.
- Recognize potential stakeholder concerns and project risks.
- Support communication planning and stakeholder engagement.
- Facilitate effective requirement gathering and decision-making.

## **3. Stakeholder Identification:**

The following stakeholders have been identified for the project.

| <b>Stakeholder</b>   | <b>Role in Project</b>                         |
|----------------------|------------------------------------------------|
| Chairman             | Project Sponsor                                |
| Principal            | Business Owner                                 |
| Project Manager      | Project Execution and Delivery                 |
| Business Analyst     | Requirement Gathering and Analysis             |
| Subject Teachers     | Assessment Data Entry and Reporting            |
| Class Teachers       | Student Performance Monitoring                 |
| Academic Coordinator | Curriculum and Academic Performance Monitoring |
| IT Administrator     | Technical Support and Deployment               |
| School Management    | Executive Decision Making                      |

## **4. Stakeholder Analysis:**

### **4.1 Chairman (Project Sponsor)**

**Role:** The Chairman sponsors the project, approves funding, and provides strategic direction.

**Interest:** Very High

The Chairman expects measurable improvements in academic reporting and operational efficiency.

**Influence:** Very High

The Chairman has authority to approve project funding, scope changes, and final implementation.

Expectations

- Improved academic performance visibility
- Better utilization of school resources
- Return on investment
- Successful implementation

#### Concerns

- Budget overruns
- Project delays
- Low user adoption

### 4.2 Principal (Business Owner)

**Role:** The Principal oversees academic operations and owns the business requirements.

**Interest:** Very High

The Principal will regularly use the dashboard to monitor school performance.

**Influence:** Very High

Approves business requirements and validates the final solution.

#### Expectations

- Real-time student performance monitoring
- Accurate academic reports
- Easy-to-use dashboards
- Early identification of weak students

#### Concerns

- Incorrect reports
- Poor dashboard usability
- Inaccurate data

### 4.3 Project Manager

**Role:** Responsible for planning, monitoring, and delivering the project within scope, schedule, and budget.

**Interest:** High

Focuses on successful project execution.

**Influence:** High

Coordinates project activities and manages project risks.

#### Expectations

- Clearly defined requirements
- Stable project scope
- Timely project completion

#### Concerns

- Scope creep
- Requirement changes

- Schedule delays

#### **4.4 Business Analyst:**

**Role:** Responsible for gathering, analyzing, documenting, and validating business requirements while acting as the bridge between stakeholders and the technical solution.

**Interest:** Very High

Ensures the proposed solution addresses business needs.

**Influence:** High

Shapes solution requirements and project documentation.

##### Expectations

- Active stakeholder participation
- Complete and accurate requirements
- Timely stakeholder feedback

##### Concerns

- Ambiguous requirements
- Missing stakeholder input
- Frequent requirement changes

#### **4.5 Subject Teachers:**

**Role:** Subject teachers enter assessment data, review reports, and use analytics to improve classroom performance.

**Interest:** Very High

Primary operational users of the system.

**Influence:** Medium

Provide functional requirements and participate in user acceptance testing.

##### Expectations

- Automated score calculation
- Reduced manual reporting
- Easy report generation
- Chapter-wise performance insights

##### Concerns

- Additional workload
- Difficult system interface
- Incorrect calculations

#### **4.6 Class Teachers:**

**Role:** Monitor overall academic progress of students and identify students requiring academic support.

**Interest:** High

Need timely access to student performance information.

**Influence:** Medium

Provide feedback on reporting requirements.

##### Expectations

- Student progress tracking
- Performance trends
- Risk identification

##### Concerns

- Delayed reports
- Missing student information

#### **4.7 Academic Coordinator:**

**Role:** Monitors curriculum effectiveness and evaluates academic performance across subjects and chapters.

**Interest:** High

Uses analytics to improve curriculum planning.

**Influence:** Medium

Provides reporting and analytical requirements.

##### Expectations

- Chapter-level analytics
- Subject-wise comparisons
- Curriculum improvement insights

##### Concerns

- Limited analytical capabilities
- Incomplete reporting

#### **4.8 IT Administrator:**

**Role:** Responsible for deployment, technical support, and maintenance of the reporting solution.

**Interest:** Medium

Ensures the system operates reliably.

**Influence:** Medium

Supports implementation and maintenance activities.

#### Expectations

- Secure data management
- Stable solution
- Easy maintenance

#### Concerns

- Technical failures
- Security vulnerabilities
- Data loss

#### 4.9 School Management:

**Role:** Uses executive dashboards to monitor institutional academic performance and support strategic decision-making.

**Interest:** High

Requires high-level academic insights.

**Influence:** High

Approves future enhancements and organizational adoption.

#### Expectations

- Executive dashboards
- Reliable KPIs
- Real-time reporting

#### Concerns

- Delayed reports
- Inaccurate analytics
- Limited visibility

#### **5. Stakeholder Expectations Summary:**

| Stakeholder          | Role in Project                                |
|----------------------|------------------------------------------------|
| Chairman             | Project Sponsor                                |
| Principal            | Business Owner                                 |
| Project Manager      | Project Execution and Delivery                 |
| Business Analyst     | Requirement Gathering and Analysis             |
| Subject Teachers     | Assessment Data Entry and Reporting            |
| Class Teachers       | Student Performance Monitoring                 |
| Academic Coordinator | Curriculum and Academic Performance Monitoring |
| IT Administrator     | Technical Support and Deployment               |
| School Management    | Executive Decision Making                      |

## **6. Stakeholder Influence Summary:**

| <b>Influence Level</b> | <b>Stakeholders</b>                                                      |
|------------------------|--------------------------------------------------------------------------|
| Very High              | Chairman, Principal                                                      |
| High                   | Project Manager, Business Analyst, School Management                     |
| Medium                 | Subject Teachers, Class Teachers, Academic Coordinator, IT Administrator |
| Low                    | None                                                                     |

## **7. Communication Considerations:**

| <b>Stakeholder</b>   | <b>Communication Requirement</b>                                   |
|----------------------|--------------------------------------------------------------------|
| Chairman             | Project milestones, business benefits, implementation progress     |
| Principal            | Requirement reviews, dashboard demonstrations, project updates     |
| Project Manager      | Weekly status reports, project risks, issue tracking               |
| Business Analyst     | Requirement workshops, stakeholder interviews, validation meetings |
| Subject Teachers     | Requirement gathering sessions, user training, UAT                 |
| Class Teachers       | Progress reporting demonstrations, feedback sessions               |
| Academic Coordinator | Analytics review meetings, curriculum discussions                  |
| IT Administrator     | Technical planning meetings, deployment schedules                  |
| School Management    | Executive dashboards, KPI reviews, project outcomes                |

## **8. Stakeholder Risks:**

| <b>Stakeholder</b>   | <b>Communication Requirement</b>                                   | <b>Stakeholder</b>   |
|----------------------|--------------------------------------------------------------------|----------------------|
| Chairman             | Project milestones, business benefits, implementation progress     | Chairman             |
| Principal            | Requirement reviews, dashboard demonstrations, project updates     | Principal            |
| Project Manager      | Weekly status reports, project risks, issue tracking               | Project Manager      |
| Business Analyst     | Requirement workshops, stakeholder interviews, validation meetings | Business Analyst     |
| Subject Teachers     | Requirement gathering sessions, user training, UAT                 | Subject Teachers     |
| Class Teachers       | Progress reporting demonstrations, feedback sessions               | Class Teachers       |
| Academic Coordinator | Analytics review meetings, curriculum discussions                  | Academic Coordinator |
| IT Administrator     | Technical planning meetings, deployment schedules                  | IT Administrator     |
| School Management    | Executive dashboards, KPI reviews, project outcomes                | School Management    |

## **9. Conclusion:**

The Stakeholder Analysis identifies all key individuals and groups who will influence or be affected by the Student Performance Analytics & Decision Support System. Understanding stakeholder roles, expectations, influence, and concerns enables the project team to establish effective communication channels, gather comprehensive business requirements, manage risks proactively, and ensure successful project implementation.

This document serves as the foundation for subsequent stakeholder management activities, including the Stakeholder Register, Power–Interest Matrix, RACI Matrix, Communication Plan, and Requirement Gathering Plan.
