| Document Name    | Power Interest Matrix                                   |
| Project Name     | Student Performance Analytics & Decision Support System |
| Client           | Mega Central High School                                |
| Business Analyst | Ramyashree GV                                           |
| Project Manager  | Phanikrishna                                            |
| Version          | 1.0                                                     |
| Date             | 22 June 2026                                            |

**1. Purpose**

The Power Interest Matrix is used to classify project stakeholders based on their level of authority (Power) and level of involvement or concern (Interest) in the project.

This analysis helps the Business Analyst determine:

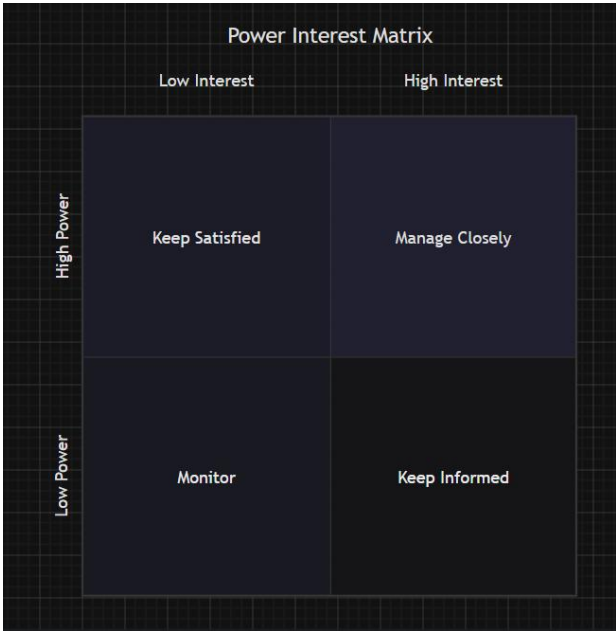

- Communication strategy
- Stakeholder engagement approach
- Decision-making involvement
- Requirement elicitation priority

**2. Stakeholder Classification**

The stakeholders are categorized into four groups:

| Category       | Description               | Engagement Approach                              |
|----------------|---------------------------|--------------------------------------------------|
| Manage Closely | High power, high interest | Frequent communication and active involvement    |
| Keep Satisfied | High power, low interest  | Regular updates and milestone reviews            |
| Keep Informed  | Low power, high interest  | Continuous communication and feedback collection |
| Monitor        | Low power, low interest   | Minimal communication                            |

**3. Power Interest Matrix**

#### **4. Stakeholder Mapping**

| <b>Stakeholder</b>    | <b>Role</b>                   | <b>Power Level</b> | <b>Interest Level</b> | <b>Category</b> | <b>Engagement Strategy</b>                               |
|-----------------------|-------------------------------|--------------------|-----------------------|-----------------|----------------------------------------------------------|
| Chairman              | Project Sponsor               | High               | High                  | Manage Closely  | Project approval, strategic decisions, milestone reviews |
| Principal             | Academic Decision Maker       | High               | High                  | Manage Closely  | Requirement validation, dashboard review, UAT approval   |
| Project Manager       | Project Coordination          | High               | High                  | Manage Closely  | Daily coordination, planning, issue management           |
| Business Analyst      | Requirement Owner             | High               | High                  | Manage Closely  | Requirement analysis, stakeholder communication          |
| Subject Teachers      | Data Providers & End Users    | Medium             | High                  | Keep Informed   | Requirement workshops, feedback sessions, training       |
| Academic Coordinators | Academic Monitoring           | Medium             | High                  | Keep Informed   | Review analytics and academic insights                   |
| IT Support Team       | Technical Support             | Medium             | Medium                | Keep Satisfied  | Technical updates and implementation support             |
| Students              | Data Subjects / Beneficiaries | Low                | High                  | Keep Informed   | Communicate benefits and data usage                      |
| Parents               | Indirect Beneficiaries        | Low                | Medium                | Monitor         | Future communication                                     |

#### **5. Engagement Strategy**

##### **Manage Closely**

Stakeholders:

- Chairman
- Principal
- Project Manager
- Business Analyst

Activities:

- Weekly project updates
- Requirement approvals
- Dashboard reviews
- Risk discussions
- Decision-making meetings

## **Keep Satisfied**

Stakeholders:

- IT Support Team

Activities:

- Technical progress updates
- Deployment discussions
- Issue escalation

## **Keep Informed**

Stakeholders:

- Subject Teachers
- Academic Coordinators
- Students

Activities:

- Requirement workshops
- Feedback collection
- User training
- Dashboard demonstrations

## **Monitor**

Stakeholders:

- Parents

Activities:

- Inform through future communication channels if required

## **6. Key Observations**

The success of the project depends primarily on active involvement from:

1. School Management
2. Teachers
3. Academic Coordinators

Teachers are critical stakeholders because they provide assessment data and will use analytical insights for academic interventions.

## **Conclusion:**

The Power Interest Matrix ensures that stakeholders receive appropriate communication and involvement based on their influence and expectations, improving project adoption and success.
