

Document Information:

Field	Details
Document Name	Current Process Analysis
Project	Student Performance Analytics & Decision Support System
Client	Mega Central High School
Business Analyst	Ramyashree GV
Version	1.0
Date	22 June 2026

1. Purpose:

The purpose of this document is to analyze the existing academic assessment and reporting process followed by Mega Central High School.

The analysis identifies:

- Current workflow
- Stakeholder responsibilities
- Existing tools
- Process limitations
- Improvement opportunities

2. Current State Overview (AS-IS)

Mega Central High School currently manages student assessment activities through a manual spreadsheet-based process.

Each subject teacher independently maintains student marks, prepares reports, and shares results with academic coordinators and school management.

There is no centralized system to consolidate academic performance data.

3. Current Assessment Reporting Process

Step 1: Assessment Planning

Responsible Stakeholder:

- Subject Teachers
- Academic Coordinators

Activities:

- Teachers prepare question papers.
- Assessments are scheduled.
- Students participate in examinations.

Step 2: Student Evaluation

Responsible Stakeholder: Subject Teachers

Activities:

- Teachers evaluate answer sheets manually.
- Marks are calculated.
- Results are recorded in spreadsheets.

Step 3: Data Storage

Responsible Stakeholder: Subject Teachers

Activities:

- Each teacher maintains separate Excel files.
- Student marks are stored subject-wise.

Example:

Mathematics_Marks.xlsx

Science_Marks.xlsx

English_Marks.xlsx

SocialScience_Marks.xlsx

Step 4: Report Preparation

Responsible Stakeholder: Teachers / Academic Coordinators

Activities:

- Marks from different subjects are combined manually.
- Percentage calculations are performed.
- Rankings are prepared.

Step 5: Management Review

Responsible Stakeholder: Principal / Management

Activities:

- Review final reports.
- Identify low-performing students.
- Plan academic interventions.

4. Current Process Flow

Assessment Conducted

Answer Sheets Evaluated

Marks Entered in Excel Files

Subject-wise Reports Prepared

Manual Consolidation

Performance Analysis

Management Review

Student Intervention

5. Current Tools Used

Activity	Current Tool
Student records	Excel spreadsheets
Marks calculation	Manual formulas
Report preparation	Excel
Communication	Email / Meetings
Performance tracking	Manual review

6. Current Process Limitations

Area	Limitation
Data Management	Multiple disconnected files
Reporting	Manual preparation
Analysis	Limited analytical capability
Monitoring	No continuous tracking
Decision Making	Depends on delayed reports

7. Improvement Opportunity

The current process can be improved by implementing:

- Centralized academic database
- Automated calculations
- Performance dashboards
- Student risk identification
- Chapter-level analytics
