

# **STUDENT PERFORMANCE ANALYTICS & DECISION SUPPORT SYSTEM**

## **1. Purpose:**

This document identifies the operational pain points experienced by stakeholders in the existing academic reporting process.

## **2. Pain Point Summary**

| <b>ID</b> | <b>Pain Point</b>                     | <b>Impacted Stakeholder</b> | <b>Business Impact</b>               |
|-----------|---------------------------------------|-----------------------------|--------------------------------------|
| P001      | Student data stored in multiple files | Teachers                    | Data duplication                     |
| P002      | Manual score calculation              | Teachers                    | Increased workload                   |
| P003      | Delayed academic reports              | Management                  | Slow decision making                 |
| P004      | No centralized performance view       | Principal                   | Limited visibility                   |
| P005      | Weak students identified late         | Teachers                    | Delayed intervention                 |
| P006      | No chapter-level analysis             | Academic Coordinators       | Difficulty identifying learning gaps |
| P007      | No performance trend tracking         | Management                  | Poor forecasting                     |
| P008      | Reporting format differs by teacher   | School Administration       | Lack of standardization              |

## **3. Detailed Pain Point Analysis**

### **Pain Point 1: Multiple Data Sources**

Current Situation: Each subject teacher maintains separate spreadsheets.

Impact

- Duplicate records
- Data inconsistency
- Difficult consolidation

Business Need: Single source of academic information.

### **Pain Point 2: Manual Report Generation**

Current Situation: Teachers manually calculate:

- Total marks
- Percentage
- Grades
- Rankings

Impact

- Time consuming
- Calculation errors
- Rework required

Business Need: Automated score calculation.

### **Pain Point 3: Late Identification of Weak Students**

Current Situation: Students requiring support are identified mainly after examinations.

Impact

- Reduced improvement time
- Lower academic outcomes

Business Need: Early warning system.

### **Pain Point 4: Lack of Chapter Analytics**

Current Situation: Reports show marks but not learning gaps.

Impact: Teachers cannot identify difficult chapters.

Business Need: Chapter-level performance analysis.

### **Pain Point 5: Limited Management Visibility**

Current Situation: Management depends on manually prepared reports.

Impact: Delayed strategic decisions.

Business Need: Real-time dashboards.
