

STUDENT PERFORMANCE ANALYTICS & DECISION SUPPORT SYSTEM

1. Purpose:

Root Cause Analysis identifies underlying reasons behind current process problems.

2. Root Cause Analysis Framework

People

Root Causes

- Teachers independently maintain records.
- Different teachers follow different reporting methods.
- Limited analytical skills.

Impact: Inconsistent reporting.

Process

Root Causes

- No standardized assessment workflow.
- Manual report preparation.
- No defined performance review cycle.

Impact: Delayed academic decisions.

Technology

Root Causes

- Dependence on spreadsheets.
- No centralized database.
- No analytics platform.

Impact: Limited automation and visibility.

Data

Root Causes

- Multiple files.
- Duplicate records.
- Missing validation rules.
- No historical tracking.

Impact: Poor data quality.

3. Root Cause Summary:

Problem	Root Cause
Delayed reports	Manual reporting process
Data inconsistency	Multiple Excel files
Late intervention	No risk monitoring system
Poor chapter analysis	Lack of analytics capability
Management visibility issues	No centralized dashboard
