

Document Information:

Field	Details
Document Name	Business Requirements Document
Project	Student Performance Analytics & Decision Support System
Client	Mega Central High School
Business Analyst	Ramyashree GV
Project Manager	Phanikrishna
Version	1.0
Date	22 June 2026

1. Purpose

The purpose of this Business Requirements Document is to define the business needs, objectives, scope, and expected outcomes for implementing the Student Performance Analytics & Decision Support System at Mega Central High School.

This document serves as a foundation for defining functional requirements and designing the analytics solution.

2. Business Objectives

The project aims to:

ID	Objective
BO001	Centralize student assessment data
BO002	Reduce manual reporting effort
BO003	Automate score calculation
BO004	Enable early identification of academically weak students
BO005	Provide subject and chapter-level performance insights
BO006	Support data-driven academic decisions

3. Business Requirements

Requirement ID	Business Requirement	Priority
BR001	The system shall maintain centralized student academic information	High
BR002	The system shall consolidate assessment data from multiple sources	High
BR003	The system shall automate marks and percentage calculation	High
BR004	The system shall provide student progress tracking	High
BR005	The system shall identify students requiring intervention	High
BR006	The system shall provide subject-wise analysis	Medium
BR007	The system shall provide chapter-level analysis	Medium
BR008	The system shall provide management dashboards	High

4. Scope

In Scope

- Student master data
- Test information
- Question bank
- Student responses
- Score calculation
- Performance analysis
- Risk identification
- Dashboard reporting

Out of Scope

- Online examination system
- Student login portal
- Parent application
- LMS integration
- AI question generation

4. Business KPIs

KPI	Purpose
Average Score	Measure academic performance
Pass Percentage	Monitor overall success
Subject Performance	Identify strong and weak subjects
Chapter Accuracy	Identify learning gaps
Risk Students Count	Monitor intervention requirements
Improvement Trend	Track student progress

5. Stakeholders

Stakeholder	Responsibility
Chairman	Project approval
Principal	Academic decision making
Teachers	Data usage and intervention
Academic Coordinator	Performance monitoring
Business Analyst	Requirement management

7. Expected Business Outcomes

The solution should:

- Reduce report preparation time by 80%
- Improve academic visibility
- Enable proactive student intervention
- Improve teaching effectiveness
- Reduce manual calculation errors
