

Document Information

Field	Details
Document Name	Use Case Document
Project	Student Performance Analytics & Decision Support System
Version	1.0
Prepared By	Ramyashree GV
Client	Mega Central High School
Date	22 June 2026

1. Purpose

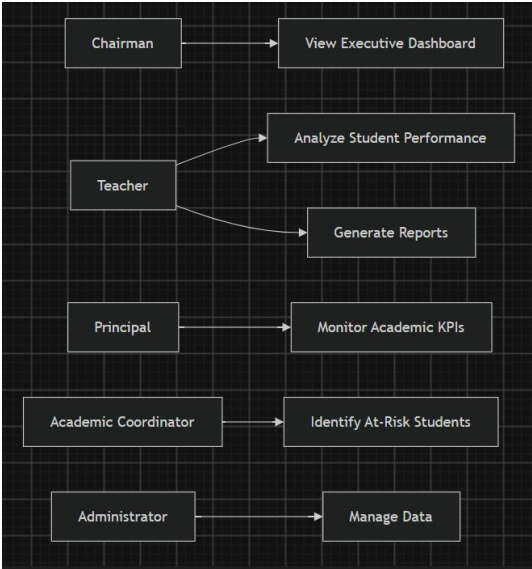

This document describes the interaction between users and the Student Performance Analytics & Decision Support System.

The purpose is to define system functionality from the user's perspective and establish a common understanding between business stakeholders and the development team.

2. Actors

Actor	Description
Chairman	Reviews institutional academic performance
Principal	Monitors overall academic outcomes
Teacher	Analyzes student and subject performance
Academic Coordinator	Tracks learning gaps and interventions
Business Analyst	Manages requirements
System Administrator	Maintains data and access

3. Use Case Diagram Overview

USE CASE 01: View Executive Dashboard

Use Case ID: UC001

Name: View Executive Performance Dashboard

Primary Actor: Chairman / Principal

Description: Allows management users to view overall academic performance through interactive dashboards.

Preconditions

- Dashboard data is available
- User has access permission

Trigger: Management user opens Power BI dashboard.

Main Flow

Step	Action
1	User opens dashboard
2	System loads KPI summary
3	System displays student performance metrics
4	User applies filters
5	System refreshes visualizations

Output

User can view:

- Total students
- Average percentage
- Pass percentage
- Subject performance
- Risk students

Exception

If data refresh fails: System displays latest available data.

USE CASE 02: Analyze Student Performance

Use Case ID: UC002

Actor: Teacher

Description: Teacher analyzes individual student progress.

Preconditions: Student assessment data exists.

Main Flow

Step	Action
1	Teacher selects student
2	System retrieves assessment history
3	System displays scores
4	System displays improvement trend
5	Teacher identifies learning needs

Output

Student performance profile:

- Average score
- Best score
- Lowest score
- Improvement trend
- Risk category

USE CASE 03: Identify At-Risk Students

Use Case ID: UC003

Actor: Teacher / Academic Coordinator

Description: Identifies students requiring academic intervention.

Main Flow

Step	Action
1	User opens risk dashboard
2	System analyzes student metrics
3	System categorizes students
4	User reviews high-risk students
5	Teacher plans intervention

Output

Risk categories:

Category
Low Risk
Medium Risk
High Risk

USE CASE 04: Analyze Chapter Performance

Use Case ID: UC004

Actor: Teacher

Description: Analyzes chapter-level learning outcomes.

Main Flow

Step	Action
1	Teacher selects subject
2	System displays chapter analytics
3	Teacher identifies weak chapters
4	Teacher plans corrective teaching

Output

- Chapter accuracy
- Difficult chapters
- Strong chapters

USE CASE 05: Generate Academic Reports

Use Case ID: UC005

Actor: Teacher / Principal

Description: Generates academic reports automatically.

Main Flow

Step	Action
1	User selects report type
2	System processes data
3	System generates report
4	User exports report

Output

Reports:

- Student progress report
- Subject report
- Risk report
- Chapter report

USE CASE 06: Manage Assessment Data

Use Case ID: UC006

Actor: Administrator

Description: Maintains assessment-related data.

Data Managed

- Student master
- Tests
- Questions
- Responses

4. Use Case Summary

ID	Use Case	Actor
UC001	View Executive Dashboard	Chairman
UC002	Analyze Student Performance	Teacher
UC003	Identify Risk Students	Teacher
UC004	Analyze Chapter Performance	Teacher
UC005	Generate Reports	Teacher
UC006	Manage Assessment Data	Administrator
