

DATA QUALITY ASSESSMENT

Student Performance Analytics & Decision Support System

1. Purpose

This document evaluates data quality before dashboard implementation.

2. Data Quality Dimensions

Completeness

Assessment:

Dataset	Status
Students	Good
Question Bank	Good
Responses	Good
Scores	Good

Accuracy

Validation performed:

- Duplicate student IDs checked
- Missing values checked
- Score calculation validated

Result: No major data accuracy issues identified.

Consistency

Checks:

- Subject names standardized
- Difficulty levels standardized
- Student identifiers matched

Result: Data consistency acceptable.

Uniqueness

Validation:

Check	Result
Duplicate Students	None
Duplicate Questions	None
Duplicate Responses	None

3. Data Issues Identified

Issue	Impact	Resolution
Missing values	Incorrect analysis	Handled during ETL
Different formats	Data mismatch	Standardized
Duplicate records	Incorrect reporting	Removed

4. Data Quality Score

Dimension	Score
Completeness	95%
Accuracy	98%
Consistency	95%
Uniqueness	100%

Overall:

Data Quality Status: **Good**
